

Bifurcation v3 — SDE-transit recovery on branched topology

a recovered λ vs v3 truth (oracle $\times$ linear)

b pre-committed criterion

Pre-committed success criterion (v3 / SDE-transit)

oracle $\times$ {PCA, FA, ICA, TruncatedSVD}:

mean λ -corr $\geq 0.60 \rightarrow$ observed -0.674 [x]

mean peak err $\leq 0.10 \rightarrow$ observed 0.584 [x]

v3 ground-truth peak $\lambda_{\max} = +0.253$ at $\tau = 0.19$

τ_{crit} (analytic) = 0.167

→ CRITERION NOT MET
